

3-4-15

To Whom It May Concern:

The Human Animal Life Foundation is an organization that brings a level of care to the community that is above reproach. Felicia Bass and Peter Schroeder exhibit excellence and patience when dealing with both the animal population, and the children they bring their unique therapy to.

Most recently, Peter and Felicia brought some of their animals to Heritage Day 2016. They provided the community with a glimpse as to what their organization is all about. They set up corral panels in such a way that provided both safety and enjoyment to the children and adults who visited their area. Their interaction with the children was nothing short of amazing. They brought some of their "at risk" children with them to staff the event, and Felicia worked with them in such a way that brought dignity to the child assisting her, utilized the animals in a humane and caring atmosphere, and brought joy to the child who was visiting the event. This combination is seldom accomplished, but both Felicia and Peter managed to accomplish it with ease.

Our organization, Historic Hernando Preservation Society, is well known in Hernando County. We work with businesses and individuals to promote the preservation of all things historic. We deal with people on a daily basis, and recognize individuals who can complete tasks that they set out to accomplish. We see tremendous potential in the Human Animal Life Foundation. We would be honored to endorse these wonderful individuals, as well as their foundation. They are a true blessing to our community. We wish them much success in all that they do. We believe that they have the knowledge and ability to make their program work. Any assistance we could provide to them would be considered an honor to us.

Sincerely,

Donnie W. Moses
President,
Historic Hernando Preservation Society
